

## Facility Master Planning & Project Management

Imperion is a forward-thinking engineering consulting firm dedicated to serving clients in the food processing and industrial sectors across California's Central Valley and beyond. Our expertise enables us to deliver comprehensive projects, identify incentive and funding opportunities, and provide end-to-end solutions tailored to each client's operational and sustainability goals. By developing actionable strategies and ensuring seamless project execution, we help our clients achieve both internal and external sustainable supply chain objectives. At Imperion, we are committed to driving positive environmental change and facilitating the transition to a more sustainable future.

## Engineering & Operational Expertise

The Imperion team are experts at identifying utility and government supported rebates and incentives and applying them to facility upgrades on a per-project basis or as part of a strategic masterplan framework that Imperion designs, implements and maintains on behalf of the facility.

- Project Management
- Retainer-Based Sustainability Manager Services
- Energy Audit & Engineering
- Measurement and Verification (M&V)
- Wastewater Consulting
- Fleet Compliance
- Greenhouse Gas (GHG) Emission Accounting and Reporting
- Technoeconomic Analysis & Feasibility
- Electric, Gas, & Water Utility & Government Incentive, Rebate and Grant Management

Delivering Energy and Cost Savings to California's Food Processing and Industrial Facilities

100 GWh  
Of Verified  
Energy Savings

12 MW  
Of Demand  
Savings

\$50 MM  
Utility Rebates/Incentives  
Grants & Financing

\$20 MM  
Annual  
Cost Savings

# Master Planning & Implementation

Imperion partners with clients to develop comprehensive strategies that prioritize projects with the highest financial returns and operational impact. By integrating planning and implementation from the start, we ensure efficient resource allocation, seamless execution, and cost-effective solutions tailored to your goals.

With Imperion, there's no need to hire an in-house specialist. Our retainer-based consulting services deliver holistic, long-term strategic management aligned with your corporate objectives, providing expertise and continuity you can trust.

# Strategic Funding Solutions

Imperion's funding solution experts help clients identify projects and funding that deliver the highest financial returns. To attain maximum ROI, funding needs to be considered as early as possible in the planning process.

## Food Production Investment Program (FPIP)

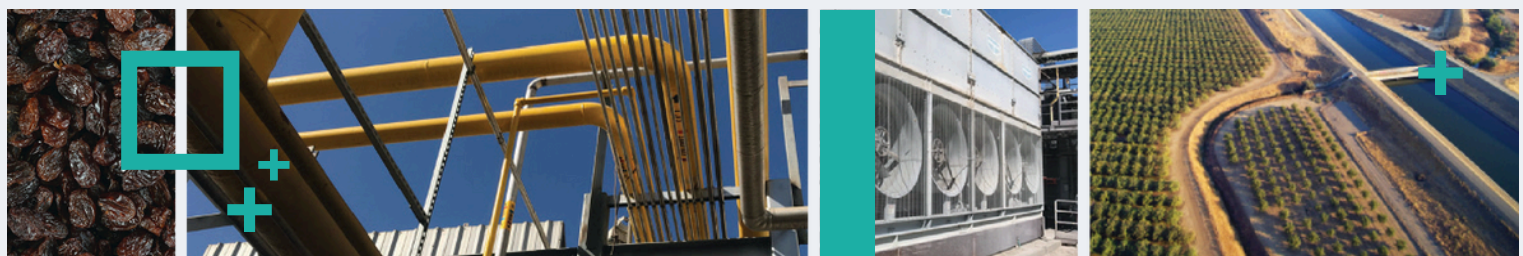

Imperion has participated in the FPIP since its inception and has successfully won five FPIP grants for California food processors totaling over \$22,000,000 in funding for a projected annual GHG reduction of 19,042 MTCO<sub>2</sub>e.

## PG&E and SoCal Gas Prescriptive Rebates (Deemed Rebates)

DEEMED rebates, which require no pre-approval, apply to specific boiler, steam trap, pipe and tank insulation retrofits. Imperion works with clients and implementation partners to confirm eligibility and process DEEMED rebate applications at no charge.

## Renewable Energy Credits & California LCFS

Renewable Energy Credits (RECs) and California's Low Carbon Fuels Standard Program (LCFS) are designed to encourage renewable energy production and help facilities meet internal and external energy use mandates and carbon intensity targets for transportation fuels. Our turn-key approach covers all phases of project implementation, ensuring projects are planned, completed, and verified while addressing program funding requirements every step of the way.
